AGORÀ

The subtle art of communication

AudioVideo

Audio

Buttons

Agorà is the new elegant and robust video door station, with slim and compact shape. Surface mounted -therefore extremely easy to install- this modular range is characterized by the very thin profile, so it slightly protrudes from the wall. Even in width, the module has reduced dimension, colour camera is conceived with pin-hole lens while front plate is made in anodised extruded aluminium. Name-holders are back lit in original blue colour for easy identification even in poor lighting conditions. Agorà can be used with all Farfisa internal stations for Duo System, 2-wire digital technology and analogue reduced wiring technology.

DUO SYSTEM

VD2121CAG

dim: mm 99x208x30

Colour audio-video door station

Composed by surface mounting box, front plate with frame, cover, door speaker, colour camera and 1 button for door stations up to 2 calls. Digital Duo System technology.
